BEATRICE M. RICHMOND, *Bookkeeper.*
LAURA B. BICKFORD, *Stenographer.*
ELIZABETH E. MEHAFFEY, *Assistant Librarian and Mailing Clerk.*
S. EDNA DAVIS, *Stenographer.*

The bulletins of the Experiment Station are published at irregular intervals and are sent *free* to all residents of New Hampshire requesting them.

The samples of fertilizer for the 1913 inspection were collected by Messrs. R. E. Skinner and W. A. Cole under the direction of the State Board of Agriculture. Aside from duplicates 187 samples were received by the State Agricultural Experiment Station for analysis.

Not all of the licensed brands of fertilizers were sampled because in some instances the goods were distributed directly from the cars in which shipment was made. In some of these instances, the goods were used very shortly after they were distributed. On this account it was not possible to sample all the brands which came into the state.

The brands which were sampled cover fairly well almost any quality of goods that can be desired for any ordinary purpose. The careful buyer should be able to find in the list a number of brands almost equally satisfactory for his needs. The New Hampshire farmer should use high grade fertilizers which carry relatively large amounts of nitrogen. These will show the largest returns under average conditions.

Messrs. D. B. Keyes, H. Eastman, M. Broggini and J. Bonardi assisted in the preparation of the following data.

Composition of Commercial Fertilizers Sampled and Analyzed in 1913.

MANUFACTURER AND BRAND.	NITROGEN.				PHOSPHORIC ACID.							POTASH.	
			Total.				Available.			Total.			
	Inorganic.	Organic.	Found.	Guaranteed.	Soluble.	Reverted.	Found.	Guaranteed.	Insoluble.	Found.	Guaranteed.	Found.	Guaranteed.
